

This technical drawing shows a cross-section of a building. The upper portion represents the roof structure, featuring a series of parallel lines indicating a sloped roof. Below the roof, there is a horizontal section representing the interior floor or ceiling, divided into three rectangular compartments by vertical lines. The lower portion of the drawing shows a large, inverted triangular shape, which likely represents a vaulted ceiling or a large structural element. The drawing is a black and white line drawing with no shading or text.
